20+ Years resolving technical issues and support tickets

10+ Years supporting the Intelligence Community

10+ Years supporting other federal agencies

Success Stories

Supported warfighters at MARFORCYBER with spearheading the Marine Corps-wide Windows migration and efficiently coordinate and monitor the massive operational rollout across the Marine Corps Enterprise Network (MCEN). We used SharePoint and similar web-based portals to track deployment metrics, manage the progress, timelines, monitor system compliance, and ensure units successfully upgraded. **The effort successfully transitioned tens of thousands of MCEN workstations, ultimately paving the way for further cloud migrations.**

Provide quality customer service to support contractors and government personnel with the drawings, documents, historic data and knowledge of WHS physical assets including the Pentagon building, reservation and remote sites. Configuring and customizing ArcGIS and AutoCAD/MicroStation for electronic drawings. **This led to a serves as the information conduit for building operators, engineers, project managers, construction contractors, first responders, and tenants within the NCR**

Developed custom sites using business information systems to enhance data analytics, visualization, process automation and organization transformation. **This resulted in a seamless process of receiving Weekly Activity Reports in a centralized location that would be sent to the Director of Intelligence.**
